DETAILED ACTION

1. The Action is responsive to Applicant's Amendment filed November 11, 2009. It is recognized that amendments were made to claims 1, 4, 16, 19, 31 and 33. Rejections and/or Objections not reiterated from previous office actions are hereby withdrawn.

2. After a thorough search and examination of the present application, and in light of the following:

Applicant's arguments filed November 11, 2009;

Parent application's prior art searched and reviewed; and

an update search on prior art conducted in domains (EAST, NPL-ACM, Google, NPL-IEEE, etc);

Claims **1-2, 4, 7-9, 11-12, 16-17, 19, 22-24, 26-27 and 31-34 (renumbered to 1-20)** are **allowed**.

Reasons for Allowance

3. The following is the Examiner's statement of reasons for allowance:

In the Examiner's Office Action for Final Rejection of August 12, 2009, the 35 U.S.C. § 103, rejections was made based on a primary reference over **Pham et al.**: "SYSTEM FOR DATA MINING USING NEUROAGENTS", U.S. Patent 5,970,482, filed February 12, 1996, and issued October 19, 1999, hereafter "Pham"; and in view of **Eftink**: "DATABASE CORRELATION METHOD", U.S. Patent 6,370,547, filed April 27, 1999, and issued April 9, 2002.

In the Amendment/Remarks/Arguments filed November 11, 2009, Applicant argued that “the Office action refers to Eftink's description of confidence levels associated with an elimination of redundant data between two datasets” and further explained that “the confidence levels of Eftink are assigned to comparisons of category identifiers (e.g., titles of two categories of data in two different datasets, such as 'Wellname no. 1' in a first dataset and 'Wellname-1') and textual differences there between”. Applicant concluded that “in contrast to the hierarchical matching grid levels of claim 1, the confidence levels of Eftink in no way define match criteria indicating which of a plurality of variables are to match. In fact, the confidence levels are assigned to comparisons already executed; not used to determine which variables are to be compared”.

Based on the arguments on the subject matter of matching and fusing records into database, it is concluded that the subject matter of:

determining an importance ranking of a plurality of variables associated with the first and second datasets;

generating a hierarchical matching grid including a plurality of levels based on the importance ranking of the plurality of variables, wherein each of the levels defines match criteria for satisfying a matching records condition by indicating which of the variables are to match;

identifying first and second sets of match candidates from the first and second datasets based on one of the plurality of levels of the hierarchical matching grid;

Art Unit: 2156

and

fusing records in the first and second sets of match candidates based on probabilities associated with the records

as high-lighted is a feature distinguishes from Pham and Eftink references' teachings cited for the 35 U.S.C 103 rejections.

Based on the subject matter as amended and incorporated, Examiner is persuaded that the cited reference does not fairly teach or suggest the subject matter described by the combined limitations as highlighted above and further detailed in each of the independent claims 1, 16 and 31.

An update search on prior art in domains (EAST, NPL-ACM, Google, NPL-IEEE, etc) has been conducted. The prior art searched and investigated in the domains (EAST, NPL-ACM, Google, NPL-IEEE, etc) do not fairly teach or suggest teaching of the subject matter as described by the combined limitations as highlighted above and further detailed in the Examiner's Amendment in each of the independent claims 1, 16 and 31.

Claims in the groups (2, 4, 7-9 and 11-12), (17, 19, 22-24 and 26-27) and (32-34) are directly or indirectly dependent upon the independent claims 1, 16 and 31, respectively, and are also distinct from the prior arts for the same reason.

After a search and a thorough examination of the present Application and in light of the prior art, Claims **1-2, 4, 7-9, 11-12, 16-17, 19, 22-24, 26-27 and 31-34 (renumbered to 1-20)** are allowed.

Conclusions

4. Any comments considered necessary by Applicants must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
